Morning DG

This is very concerning. There is a significant potential risk to TMR in our ability to deliver the QTRIP if changes are made to minimum conditions without us having the opportunity to consider impacts and how we would implement. I don't know how much Mins office is across what is being proposed (I think previously Min De Brenni had wanted Min Bailey to co-sponsor this sub but it looks like De Brenni is taking it up solo). Is it possible for this to be added to discussion today/ tomorrow with Mins office? We would need more time to formulate an appropriate response- especially given, as I understand it, these changes have not been discussed with TMR in the interactions we have had with HPW.

 Report back on best practice principles

Amanda, Les

This CLLO has landed today and seems to include recommendations for some very significant changes to the implementation of Minimum Conditions on Best Practice Principles projects. As far as I know HPW hasn't previously consulted with TMR on much of the proposed recommendations.

Due date is tomorrow but I think we will struggle to provide comprehensive advice to Minister Bailey in that timeframe.

Will keep you updated. We're working with CPO to do what we can.

Cheers

Allan
